"DON'T YOU WORRY." How Shrewd Business Men Have Solved a Great Problem.

"Is there a fatality among our promi-nent men" is a question that we often ask. It is a question that perplexes our leading medical men, and they are at a

loss to know how to answer it.
We sometimes think that if the physicians would give part of the energy to the consideration of this question that they give to combatting other schools of practice, it might be satisfactorily answered.

The flights of "isms" reminds us often of the quarrels of old Indian tribes, that were only happy when they were anni-hilating each other. If Allopathy makes a discovery that promises good to the race, Homepathy derides it and breaks down its influence. If Homepathy makes a discovery that promises to be a boon to the race,

Allopathy attacks it.

It is absurd that these schools should fancy that all of good is in their methods and none in any other.

Fortunately for the people, the merit which these "isms" will not recognize, is recognized by the public, and this public recognition, taking the form of a demand upon the medical profession, eventually compels it to recognize it. Is it possible that the question has been answered by surered business non?

By a careful examination of insurance reports we find that there has been a sharp refern with reference to examination of the state ations, (and that no man can now get any amount of insurance who has the least development of ki-locy disorder,) because they find that sixty out of every hundred in this country do, either di-rectly or indirectly, softer doin kidney disease. Hence, no reliable company

This remires us of a little instance which occurred a short time ago. A fellow said, and applicant for a respectable amount of insurance. He was rejected on examination, because unknown to himself, his kidneys were diseased. The shewdage to how aver, did not give up the case. He had an eye to business and to his commission, and said: "Don't you worry; you get a half dozen bottles of Warner's safe cure, take it according to disections and in about a mosth come around, and we will have month come around, and we will have another aramination. In our files we find thousands of strong onials for Warner's rafe cure, no two alike, which could not exist except upon a basis of truth; indeed, they are published under a guarantee of \$5,000 to any one who will disprove their correctness, and this offer has been standing, we are told, for more than four years.

The CHRISTY & The coming horse will be a fast favorable to the cattle business, and Blackleg is said to be killing cattle calf crop promises to be good. There is a strong teeling of confidence in the value of cattle properties. The presence of several heavy buyers has done much to stiffen prices in ranch-

The proposition to open up a trail to the steer ranges of Wyoming and Montana is a good one and if done will attract buyers from that country to Arizona, and offer a more profitable market for range steers. Hon. Brewster Cameron, who, so ably represented the stock interests of the territory at the recent meeting of the International Range Association, was approached by buyers from these territories, and they told him that all that kept them away from Arizona was the lack of a good trail by which of Jordan Valley, Oregon, has issued the cattle could be driven to their cific Coast to ride any number of as cattle, and if a good trail is opened Broncos mained, \$500 to \$1,000 they will certainly come here to buy.
